

HIMPREET KAUR

Senior Quality & Test Automation Engineer | SaaS, Blockchain & Enterprise Systems

kaurhimpreet95@gmail.com | +91 7015722542

<https://www.linkedin.com/in/himpreetkaur4testing/> | <https://github.com/himpreetk>

CAREER PROFILE

A results-driven QA Engineering professional with 7 years of experience delivering high-reliability software across SaaS, Blockchain, and enterprise platforms, specialising in test automation, Shift-Left quality strategies, secure API validation, and CI/CD-driven delivery. I have led quality transformation initiatives across global and UK-based engineering teams, building scalable Selenium-based automation frameworks, improving release stability, and reducing post-production defects by up to 40%. With hands-on expertise across Agile environments, cross-functional collaboration, and risk-based testing, I bring a strong balance of technical depth, structured engineering discipline, and product-centric quality leadership to enable resilient, high-performing digital platforms.

AREAS OF EXPERTISE

Quality & Testing Leadership: Test Automation Strategy | Shift-Left & Continuous Testing | Regression & Exploratory Testing | Cross-Browser Testing | API & Integration Testing | Testability Reviews | SDLC / STLC Governance | **Automation & Technical Skills:** Selenium (Java) | TestNG | Appium | REST Assured | Postman | JMeter | BDD / TDD | SQL | Java | Python | JavaScript | Playwright | Cypress | **DevOps & Delivery:** Jenkins | GitHub Actions | Azure DevOps | CI/CD Pipeline Integration | Docker | **Quality Operations & Reporting:** Defect Leakage Analysis | RCA | Quality Metrics & KPIs | Zephyr | TestRail | JIRA | YouTrack | Trello | Linear | Plane | **Cloud, Security & Compliance:** AWS | Security Testing Awareness | GDPR-aligned testing practices | **AI-Assisted Development Tools:** Google Antigravity | Cursor

KEY ACHIEVEMENTS

- Designed and scaled automation frameworks that reduced regression testing time by 40% and improved release confidence across enterprise product modules.
- Embedded Shift-Left testing practices across product lifecycles, cutting post-release defects by up to 40% and strengthening early-stage quality alignment.
- Improved backend service reliability by 25% through structured API test coverage using Postman and REST Assured across critical product integrations.
- Led automation adoption initiatives for high-priority enterprise workflows, increasing test efficiency and enabling faster build verification cycles.

PROFESSIONAL EXPERIENCE

SDET II | WebBuddy LLC, India | Sept 2025 – Present

Key Achievements:

- Led the end-to-end quality strategy for an enterprise-grade blockchain platform, introducing automation-first practices that reduced regression cycle time by **42%** and strengthened release stability across core modules.
- Designed and implemented a scalable Selenium-TestNG automation framework leveraging AI-assisted test generation, integrated with CI/CD pipelines, increasing regression test coverage by 55% and reducing manual testing effort by **40%** per sprint.
- Championed Shift-Left testing in collaboration with product and engineering teams, cutting post-release defects by **35%** and accelerating feedback loops during development.
- Standardised quality processes and engineering best practices across parallel projects, improving defect traceability and reducing production defect leakage by **28%**.

Automation Engineer | Dev3 Technologies | India | Mar 2025 – Sept 2025

Key Achievements:

- Led the QA team and mentored two junior engineers, strengthening test ownership and improving automation delivery consistency across projects.
- Embedded Shift-Left testing by working closely with product, development, and DevOps teams, improving early-phase defect detection and reducing post-release issues by **40%** across e-commerce platforms.

- Integrated Selenium automation suites with Jenkins and Docker, reducing build verification time by **30%** and increasing deployment confidence in CI/CD pipelines.
- Performed structured API testing using Postman and REST Assured, improving backend reliability and integration stability by **25%** across critical services.
- Enhanced test traceability and reporting through JIRA workflows, improving stakeholder visibility and accelerating defect resolution cycles.

Quality Analyst | Intellicore Ltd, United Kingdom | Mar 2022 – Aug 2023

Key Achievements:

- Delivered manual functional, regression, and UI testing across complex enterprise applications, improving release stability and ensuring high-quality production deployments.
- Collaborated within Agile Scrum teams to expand test coverage and close requirement gaps early in the lifecycle, reducing downstream defects and strengthening delivery predictability.
- Designed comprehensive test scenarios and implemented structured defect reporting, contributing to a 30% reduction in post-release issues and improved stakeholder confidence in release quality.
- Initiated and scaled a Selenium-based automation framework, reducing regression testing time by 40% and enabling faster sprint-level validation across enterprise modules.
- Conducted API and integration testing using Postman and REST Assured, improving data-flow reliability and preventing service-level failures across critical enterprise services.

QA Analyst | CodeBrew Labs, India | Dec 2019 – Aug 2020

Key Achievements:

- Transitioned high-priority test scenarios from manual to automated using Selenium, reducing software defects by **35%** and improving overall release quality across product modules.
- Validated backend APIs through Swagger UI and integration testing, ensuring secure data flow and smoother interoperability with third-party services.
- Improved test documentation and streamlined defect-reporting workflows, accelerating bug-resolution cycles and strengthening collaboration between QA and development teams.
- Supported the optimisation of regression and functional testing processes, increasing test coverage and reducing defect leakage into production environments.

PRIOR ENGAGEMENTS

- Office Assistant | URB Recruitment, UK | Sept 2023 – June 2024
- Junior QA Tester | UnoiaTech, India | Aug 2019 – Nov 2019
- Software Tester Trainee | Piford Technologies, India | Jul 2018 – Dec 2018

EDUCATION

- MSc Computer Science with Professional Practice | University of Wolverhampton, UK | Year Highest Merit Achiever | Led collaborative software engineering project initiatives
- Bachelor of Technology in Computer Science | Kurukshetra University, India

Projects

- **Car Parking Smart Booking Solution** | University Project | Designed an intelligent parking allocation and booking system with mobile integration and automated payment workflows. https://github.com/himpreetk/Car_Parking_Solution
- **Majestic Toys E-Commerce Platform** | University Project | Developed an end-to-end commerce platform using ReactJS, CodeIgniter3, NodeJS, and MySQL. <https://github.com/himpreetk/My-Majestic-Toys>

PROFESSIONAL INTERESTS

Automation Engineering | Quality Engineering Innovation | AI-Assisted Testing | Secure Engineering Practices | Continuous Improvement & Delivery Excellence | Mentoring & Open Source Contributions
